

Absenicon X Series

Posted on January 23, 2024

Step into the future with Absenicon X - where cutting-edge visuals meet unparalleled interactivity. Choose from expansive 108", 136", and 163" screens that boast breakthrough flip-chip COB technology and optional interactive touch capabilities. Tailor-made for professional spaces such as boardrooms, meeting rooms, and showrooms, the Absenicon X series transforms ordinary presentations into collaborative masterpieces.

Unrivalled Visual Experience

Integrating multiple Absen image optimization technologies, the Absenicon X Series enhances the clarity and visibility to bring out natural details and vivid colours for realistic and incredible images.

- Full-screen calibration
- 90% BT2020 cinematic colour gamut
- 15000:1 contrast ratio

All-in-one Design with Delicate Details

The Absenicon X Series comes as a complete kit ready to install including controller, audio, PSU and all necessary display elements needed for the installation. There's no need for complex wiring and debugging, it's easy to install and use. The design of a lift type control box satisfies the 97% above high screen ratio and the convenience of installation and maintenance.

Step Into the Future Where Accuracy Meets Interactivity

Equipped with a high-precision infrared touch system, the Absenicon X Series revolutionizes interactivity and elevates user engagement. With 1mm touch accuracy and support for 20-point multi-touch and smart gestures, it delivers seamless and intuitive interactions.

Remote Control for Easy Operation

Remote control for on/off switches, brightness adjustment, content switching, settings, etc.

An infrared & Bluetooth remote control that covers a transmission distance of 20m.

Compatible with AV Control Systems

Ethernet control protocols are provided for control systems such as Crestron and Extron making for easy integration which saves the system integrator both time and money with onsite programming.

Wireless Screen-mirroring

Cast up to four images from participants' devices for team review and collaboration.

Intelligent System with Upgraded Performance

The Absenicon X Series comes with a standard Android 11.0 operating system. A Windows operating system is available through an additional OPS computer. An Ultra-large memory and a powerful 4-core processor are included for a smooth and fast performance for wireless screen mirroring from phones, computers, and other devices.

√Android 11.0 / Windows 10 (optional)

√4G+32G

Durability in Demanding Spaces

The panel-type COB encapsulation technology effectively protects the display from external impact. The ultra-long service life of 100,000 hours provides a lower cost of ownership and reduced carbon footprint.

Modular Design, Flexible Installation

The modular design enables it to be easily transported to offices and in elevators. The Absenicon X Series can be mounted on a wall, on a mobile stand, or on the innovative electric lifting bracket for height adjustment. The endless installation possibilities fit your needs in any environment.
