Cincinnati, OH - Green Hippo, an industry leader in media manipulation and 3D mapping, is thrilled to announce the shipment of its new, award-winning 2U Hippotizer MX Series Media Servers, KASAI MX and TAGUS MX.

Perfect for smaller environments and tours, KASAI & TAGUS combine tour-proof hardware with incredible performance. Users can run two 4K outputs with confidence, or a smaller single output all from a single 2U media server. Perfect for touring, KASAI offers genlock for large surface

displays that need more than one output. In comparison, TAGUS is ideal for corporate and installation environments with multiple displays that do not require genlock.

The Hippotizer MX Series offers five new customizable, dependable, and future-proofed Media Server solutions that enhance workflow efficiency with the best in high-quality playback and purpose-built design.

Building off 20 years of robust and dependable hardware, the Hippotizer MX Series provides 10-bit video playback for accurate color reproduction, supporting SMPTE 2110 and IPMX workflows, as well as easy system customization, and seamless delivery of large media and quality playback. Crafted for designers, touring professionals and integrators, the new solutions offer rear-chassis illumination, upgradeable and swappable media drives, customizable output configurations, and an OLED display.

“We are incredibly excited to ship the first units of the Hippotizer MX Series Media Servers, KASAI and TAGUS, our new 2U variants,” says Nick Spencer, Technical Product Manager, Green Hippo.

“With the award-winning Hippotizer MX Series now in the hands of Live Event and Pro AV professionals, we look forward to seeing how these advanced tools will inspire and push the boundaries of creativity across the industry.”
